

Stop toiling over third party risk

VISO TRUST is the leading Third Party Risk Management (TPRM) Platform for the modern enterprise. We extract risk intelligence from documents, assets, and networked information to deliver fast and accurate vendor assessments.

Meet VISO TRUST

Effective TPRM is more than just a safeguard; it's a crucial competitive advantage that enables **rapid innovation while eliminating risk**. Existing TPRM approaches have significant tradeoffs often resulting in inadequate risk mitigation and broken processes.

Our approach

Powered by Artifact Intelligence

In 10 seconds our AI extracts risk-relevant information that takes an expert 10+ hours to do manually. We operate on artifacts—defined as any piece of information that contains evidence of security controls—and vendors simply share audits, config files, policy documents, and other artifacts that have been already created by their security programs.

Backed by experts

We guarantee 100% accuracy of our assessments. Every assessment is reviewed by a team of experts and escalation is one click away, 24/7.

Built on a robust framework

The VISO Risk Framework, based on NIST 800-53, spans risk dimensions including Security, Privacy, AI Trust, Resilience, and Product Security and their most meaningful controls mapped to 30+ common frameworks.

Enriched by network intelligence

Go beyond the insight from a single assessment to understand program risk through a network lens. We aggregate data from diverse public and private sources to build understanding of who does business with whom so that you're prepared in the event of a vendor breach.

Powerful features, transformative results

Continuous due diligence

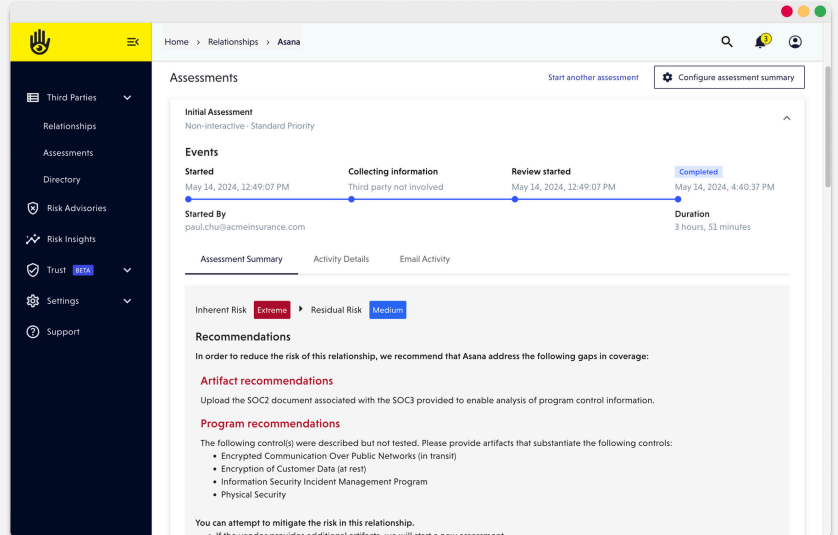

Our automation manages relationship lifecycle events like remediation, periodic re-assessment, and risk acceptance. Real-time monitoring notifies you of vendor and fourth party breaches. We deliver continuous insights at both a vendor relationship and program level to ensure compliance and comprehensive risk mitigation.

Smart artifact collection

Real-time artifact analysis simplifies document collection process, achieving 98% vendor adoption.

Integrations

Our platform seamlessly integrates with tools like Coupa, Netskope, Slack, and ServiceNow, enhancing your existing workflows and ensuring smooth data synchronization. These integrations allow you to build a program that works for your enterprise.

Take action with clear recommendations and one-click remediation
